Strategy & Problem Structuring • Energy, Resources & Industrials • Financial Analysis

Strategy and energy sector professional with 4+ years delivering structured analysis, business case development, and executive-ready recommendations across a $2B+ midstream asset portfolio. Brings a P.Eng. technical foundation and MBA training to decompose complex, ambiguous problems — from carbon compliance strategy to competitive benchmarking and scenario modeling. Proven ability to own workstreams end-to-end, synthesize quantitative and qualitative insights, and influence investment decisions at the executive level. Deep domain expertise in Alberta's energy and industrial landscape, with a track record of translating analytical rigor into $11M+ in commercial margin improvements for a leading Canadian midstream operator.

CORE COMPETENCIES

Strategy & Problem Structuring	Financial Modeling & Valuation	Energy Sector Expertise
Hypothesis-Driven Analysis	Scenario & Sensitivity Modeling	Midstream Commercial Strategy
Stakeholder & Executive Comms	Business Case Development	Carbon Compliance & TIER
Workstream Delivery & Synthesis	Excel · Power BI · SQL · Python	Market Research & Competitive Intel

PROFESSIONAL EXPERIENCE

Commercial Operations Analyst | Keyera Energy Corp. | Calgary, AB — Jul 2024 – Present

- Built and maintained energy and financial models across a **$2B+ portfolio of 6 midstream processing facilities**, integrating throughput forecasts, commodity pricing, carbon compliance costs, and capital inputs to support commercial opportunity evaluation, investment decisions, and long-range strategic planning.
- Identified **$5M in annual cost savings** and developed strategies to grow **EBITDA margins by $8–10M** through rigorous asset-level analysis of energy demand, process efficiency, and carbon compliance positioning.
- Led a competitive benchmarking engagement with global consultants across 6 facilities; translated outputs into operational and energy optimization recommendations that **generated $6M in sustained margin improvements**.
- Developed risk-adjusted commercial scenarios integrating market, regulatory, and operational assumptions — including carbon cost trajectories and compliance exposure — to support due diligence efforts, investment prioritization, and strategic planning with senior leadership.
- Collaborated cross-functionally with engineering, legal, finance, and regulatory teams to assess commercial opportunity viability and support business development initiatives, ensuring alignment across the full negotiation cycle and due diligence process.

Sustainability Financial Analyst | Keyera Energy Corp. | Calgary, AB — May 2023 – Jun 2024

- Developed long-range carbon compliance and commercial cost models forecasting exposure across 6 upstream and midstream facilities, translating Alberta TIER regulatory requirements, commodity dynamics, and carbon credit market movements into **strategic insights for finance and executive leadership**.
- Maintained and updated **carbon compliance calculation methodologies aligned with evolving TIER requirements**, ensuring accurate facility-level GHG quantification and regulatory reporting readiness.
- Delivered **>$1M in cash flow optimization** by modeling compliance scenarios, assessing abatement pathways, and identifying low-cost credit strategies — converting regulatory complexity into quantifiable commercial value for finance and executive leadership.

- Provided ad hoc scenario analysis and technical support to senior leadership on carbon regulation impacts, energy transition policy, and emerging GHG quantification methodologies tied to operational configuration changes.
- Built analytical frameworks to assess carbon credit valuations, compliance cost trajectories, and technology investment returns, supporting third-party verification processes and external sustainability disclosures.

Business Development Analyst | Keyera Energy Corp. | Calgary, AB Jan 2022 – May 2023

- Conducted market research and competitive intelligence across the Western Canadian energy landscape, monitoring producer activity, infrastructure developments, and market trends to inform **business development strategy and opportunity identification**.
- Supported due diligence and growth opportunity screening by analyzing midstream market trends, basin-level production outlooks, and competitor positioning; developed commercial materials and presentations for senior leadership and Investment Committee review.
- Automated tracking and reporting for **320+ midstream commercial contracts**, eliminating 1,000+ hours of annual manual effort and improving data quality for strategic evaluations, commercial negotiations, and contract due diligence.

Internship & Early Roles | Imperial Oil & Calgary Startups | Calgary, AB Jan 2018 – Dec 2021

- Authored regulatory and environmental compliance plans for Imperial Oil terminal operations, coordinating with regulators and operations teams to de-risk liabilities and support ongoing asset viability.
- At early-stage ventures, developed business plans, financial models, and go-to-market strategies; **secured $15,000+ in funding** through investor presentations at international pitch competitions.

EDUCATION

MBA Candidate (Expected 2027) Calgary, AB
Haskayne School of Business, University of Calgary

Master of Management (2021) Calgary, AB
Haskayne School of Business, University of Calgary

Bachelor of Science, Mechanical Engineering (2020) Calgary, AB
University of Calgary

Achievement: Led business plan implementation for two Calgary start-ups through MITACS; secured $2M in funding.

CERTIFICATIONS & TECHNICAL SKILLS

Financial Modeling: Wall Street Oasis – Oil & Gas Financial Modeling | Marquee Group – Financial Modeling & DCF Analysis
Data & Analytics: Code Academy – Data Scientist (Analytics Track)
Technical Tools: Microsoft Excel (Advanced) · PowerPoint · Power BI · SQL · Python · R
